TRẦN TRỌNG TÌNH

AI Intern

0907 515 901 | tinhttce201105@gmail.com
Cần Thơ, Vietnam | Born February 28, 2006

CAREER OBJECTIVE

Artificial Intelligence student at FPT University (expected graduation 2028) with hands-on research experience in object detection. Seeking an AI Intern position at FPT Software to apply my skills in Python, model experimentation and evaluation to real-world computer vision projects. Eager to learn from experienced engineers while contributing through teamwork and clear presentation of results.

EDUCATION

Bachelor's Degree in Artificial Intelligence — Cần Thơ, Vietnam

FPT University

- Expected graduation: 2028
- Coursera certificates:
  - Ethics in the Age of AI Specialization, LearnQuest (July 2026) View certificate
  - AI Foundations for Everyone Specialization, IBM (January 2026) View certificate
  - Academic Skills for University Success Specialization, The University of Sydney (November 2025) View certificate

WORK EXPERIENCE

Low-light Object Detection: YOLO11n Ablation Study (ExDark)

Research Project, FPT University | Ongoing

- Conducted one-variable-at-a-time ablations on YOLO11n (backbone, downsampling, neck and loss changes) using the 12-class ExDark benchmark on Kaggle GPUs.
- Proposed a lightweight model (C3k2_SA + Coordinate Attention + ADown) reaching **mAP50-95 of 23.9%** vs. 20.5% for the YOLO11n baseline at 100 epochs, with ~2.6M parameters and 73 FPS on a Tesla T4.
- Diagnosed failed ideas (e.g., Focal Loss incompatible with Ultralytics' TAL assigner) and fixed bugs in training scripts.
- Writing a manuscript in Springer LNCS format (in preparation, not yet published) and extending it into a journal version.

KEY ACHIEVEMENTS

Model Efficiency
Achieved mAP50-95 of 23.9% with ~2.6M parameters and 73 FPS on a Tesla T4.

YOLO11n Improvement
Raised mAP50-95 from 20.5% to 23.9% (+3.4 percentage points) over the baseline at 100 epochs.

Script Debugging
Diagnosed failed ideas and fixed bugs in training scripts.

Academic Writing
Writing a manuscript in Springer LNCS format (in preparation, not yet published).

SKILLS

Programming
Python

Machine Learning
Machine learning
Object detection (YOLO11n, Ultralytics)
Scikit-learn

Data Analysis
Pandas, NumPy
Microsoft Excel

Other
CapCut video editing

Soft skills
Presentation
